

SIPL Solar LED Skylight

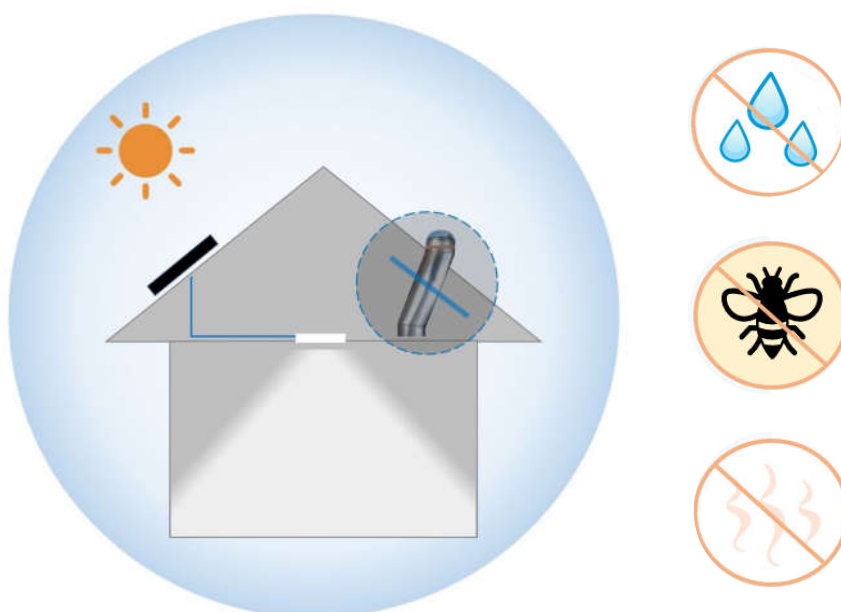

Let The Generous Sunshine Brighten Your Daily Life

SIPL Solar LED Skylight combines advanced solar technology with modern LED lighting and make breakthrough to traditional daylighting way, as an ideal skylight alternative for day and night lighting in high efficiency, for your ease, convenience and best experience on daily green lighting!

Inspired by window skylight and tubular skylight, [SIPL Solar LED Skylight](#) is designed as an innovative green home device on illumination. It leads the outdoor sunlight into any darkroom easily through solar panel, not only fast-to-install but also long-lasting without any hassle!

It needs no holes nor light shafts on the roof, so no worry about roof leakage, no bugs collecting in the light, no heat nor UV transfer to your room; and can also work in a multi-stories house.

Solar LED Skylight #SN2017061

A green solar LED skylight for a LED panel directly powered by solar during sunny daytime, to automatically light on as long as the sunlight is available. Let you enjoy the free solar daylighting depending on the natural sun shines condition.

Model	#SN2017061
Light fixture	Dia.300x12mm LED panel light, flush mounted
Solar panel	30W polycrystalline solar panel (with mounting base & braces)
Light source	SMD2835 LED chips (lifespan-50000 hours)
Color temperature	5000~5500K (Pure White)
Lumen	Max 3510lm
Remote control	Available, to on/off/dim the solar skylight at any time
Cable	15m cable with quick wire connector
Lighting mode	Automatically light on when there is sunlight
Warranty	5 years warranty

Solar Lighting Mode

Solar LED Skylight #SN2017062

A green solar LED skylight for one LED panel powered by solar battery at zero electricity cost; radar sensor is included to automatically control light on/off, to deliver energy efficient solar smart lighting for day and night.

Model	#SN2017062
Light fixture	Dia.300x12mm LED panel light, flush mounted
Solar panel	30W polycrystalline solar panel (with mounting base & braces)
Light source	SMD2835 LED chips (lifespan-50000 hours)
Color temperature	5000~5500K (Pure White)
Lumen	1158lm
In-built battery	6.4Ah 19.2V lithium battery (fully charged in 5.5h, durable for lighting 11.6h)
Controller box	Included, with radar sensing function to automatically on/off the skylight
Remote control	Available, to on/off/dim the solar skylight at any time
Cable	15m cable with quick wire connector
Lighting mode	Smartly light on / off when people is there / left; Or to be turn on/off/ dim flexibly by remote control
Warranty	5 years warranty

Solar Lighting Mode

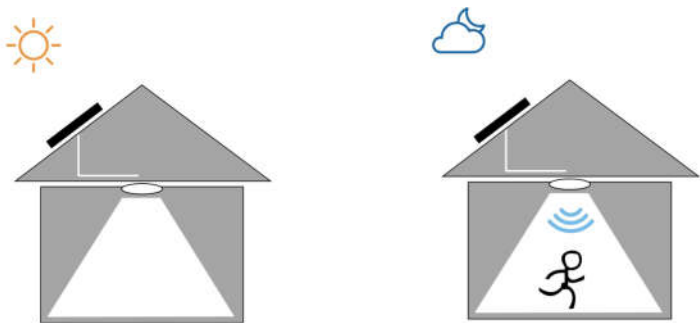

Solar LED Skylight #SN2021004

A green solar LED skylight for a LED panel directly powered by solar in sunny daytime, while with AC/DC adapter to keep lighting by grid electricity as backup in sunless time; radar sensor is included to automatically control light on/off, to deliver energy efficient solar smart lighting for day and night.

Model	#SN2021004
Light fixture	Dia.300x12mm LED panel light, flush mounted
Solar panel	30W polycrystalline solar panel (with mounting base & braces)
Light source	SMD2835 LED chips (lifespan-50000 hours)
Color temperature	5000~5500K (Pure White)
Lumen	1158lm
AC/DC adapter	Included for lighting even in sunless time by grid power backup
Controller box	Included, with radar sensing function to automatically on/off the skylight
Remote control	Available, to on/off/dim the solar skylight at any time
Cable	15m cable with quick wire connector
Lighting mode	In sunny daytime, automatically light on; In sunless time, smartly light on / off when people is there / left; Or to be turn on/off/ dim flexibly by remote control.
Warranty	5 years warranty
